

**"Fuel-saving driving styles must be supported" that said the Environmental Principles Products from 1.12.2008**

**If the target has actually been reached on a vehicle over the last 10 years, it seems to be an exception.**

**VW brakes corrode when used sparsely, which may lead to accidents and human suffering.**

**Suggestion:**

**put emphasis on this goal!**

**We need economic cars that are suitable for fuel-efficient styles of driving. Or electric cars, that are suitable for power-saving styles of driving.**

**The Sustainability**

**Report 2014 aims to**

**reduce consumption in**

**customer operations**

**Was the goal achieved?**

**How was this checked?**

**The Sustainability  
Report 2017 shows  
dramatic regression  
As late as 2025  
random, realistic tests  
on the road shall be  
introduced**

# Press release 333/2017

claims: “Volkswagen Group  
raises its environmental  
targets”

There remain doubts  
concerning the  
interpretation of this Media  
Information.

**If you are confused  
about the VW  
environmental goals -**

**go to:**

**www.vw-**

**umweltziele.de**

**Proposal: create long-term  
transparency in the  
environmental goals! use PDF  
files and permanent links!**

**Handover of access data for [www.vw-umweltziele.de](http://www.vw-umweltziele.de) to Ms. Werner in the  
business area "Integrity and Law"**

**I wish you an exciting  
debate**
